

WHERE TO SEEK RESTORATION/REPAIR HELP

Whilst we endeavour to help visitors with their individual queries, there are sites that are out there that specifically cater for this.

Although the following list is not exhaustive, I would be bold enough to say that if there's something you need to know and you are unable to find it on one of the following, then nobody knows!

WARNING

Always bear in mind that the Australian vehicles did not always follow the US or UK models, especially the dates, so bear in mind, most of what you are told, will be from either an American or British perspective. Having said that, if you ask a question on any of these sites, make sure you mention that you have an Australian assembled MGB and most of them will temper their replies to suit.
