

# COMPONENT MANUFACTURERS

There is some doubt as to which company supplied what for the Australian-assembled MGB.

As close as I can get to the complete picture is provided by the following original document *see Note* from BMC Australia. Two of the four pages of this document are shown below. Whilst it is related to BMC Australia in general, it can be reasonably assumed that specifically these were the companies involved in supplying the MGB components.

## [Component Manufacturers and Warranty Procedure](#)

*Note: I have just been reliably informed by John Lindsay (former BMC Manager) the above document relates, in fact, to the Austin X6 (Tasman & Kimberley). I have decided to leave the document here as it can be instructive.* Roger Sharpe – 26/9/22
