

## **Separated then reunited after 38 years!**

Hi,

I have this car ( again). The compliance plate says it was originally black, It is now dark blue and has been since I originally owned it. Original Victorian plates IYN698 , but has been MG1966 for the last 38 years or so.

I bought the car in late '82 as a new graduate with money to burn privately in Geelong.

I had it till early '84 I guess. Some basic work to it but nothing major. Just not a practical vehicle when it was the only car I drove. Spun it in the rain on the Melbourne road once and on the GOR (*Great Ocean Road*) too ( upholstery never smelt the same after that one!)

Reluctant sale, with the custom plates I put on. I always regretted selling it.

I've looked for it about twice a year for the last 20 and found it for sale in Carrum Downs two weeks ago. Semi private sale and the fellow had owned it since '95 but couldn't get into it any more. I'm 60 now and I had to buy it. It's in reasonable shape, always garaged and certainly needs a good tidy up, but worth every cent. I will bring it up to as good as I can get over time - drive it in summer and work on it in winter. Perfect. I am absolutely rapt!!!
