FOR THE ATTENTION OF SERVICE AND PARTS MANAGERS

DECIMAL CURRENCY WARRANTY CLAIM SUBMISSION

ARE YOU PREPARED?

As most people will be aware the change-over to decimal currency will become effective on a national basis on "C" Day - 14th February, 1966.

It will be apparent that the whole change-over cannot be effected on "C" Day and that there will be a need within all Organisations to progressively introduce procedures in decimal currency into their systems prior to this date.

B.M.C. have developed and adopted such a plan and this requires the change to the decimal system for all claims submitted by Distributors or Dealers as from 20th September, 1965. From this date onwards parts prices and labour charges are to be shown in dollars and cents, typed in the £'s and shillings' columns of the present Claim Form - the pence column is to be left blank.

Any outside Repairers' invoices must be converted to dollars and cents and shown on the Claim Form as "material".

To assist you in preparing your claims in this manner the attached hourly rate table has been re-printed showing both £. s. d. and the equivalent in dollars and cents. Similarly Parts and Accessories Division will be issuing a new Price List with the prices in both currencies. This will be available to you before September.

As it will not be possible to make actual cash transactions in decimal currency prior to "C" Day we will be, on completion of our assessment of claims, converting the total amount accepted in dollars and cents to £. s. d. for payment. Both these amounts will be shown for your reference and records on both the Summary Sheets and Acceptance Letters.

We know that we can look forward to your whole-hearted co-operation during this transition period, and we would recommend that you examine how this new procedure will "knit" into your own Organisation and let us know as soon as possible if you foresee any difficulties as we are most anxious to assist where possible.

N. Prescott
