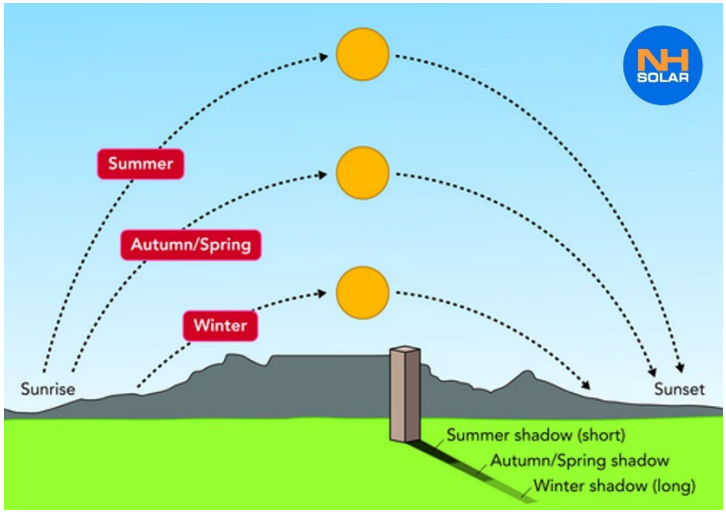
CANCER (SKIN)

Without doubt, one of the alluring attractions of driving an MGB is that feeling of driving without a roof on the car (and all of its pro's and con's). It is, however, important to draw attention to the consideration of the effect on the person of the sun and wind.

This topic was brought up by Richard Spurling on the following forum, with some interesting comments from its audience (https://www.mgexp.com/forum/mgb-and-gt-forum.1/sun-protection.4979819/). The comments in the thread highlight the concerns and steps that many drivers take to minimise or deal with these concerns. I have listed below (as at September, 2025) many of the precautions that are commonly used. The choice is yours. *Roger Sharpe, Sep '25*



Sun awareness

Zip out rear window

Bimini top

Sunglasses

Fishing shirt

Golf sleeves and UV-reflecting sleeves

Cycling jacket, sun gloves, performance shirt

Sunscreen
